ABOUT ME

Software Engineer with hands-on experience building web applications, backend services, and AI-powered features. Experienced in developing application features, working with APIs and databases, debugging issues, and writing automated tests. Interested in building reliable software, improving application performance, and using AI to solve real-world problems.

PROJECTS

Personal Portfolio Application | Flask, React, PostgreSQL

- Built a personal finance application to manage bank accounts, credit cards, savings, assets, investments, and transactions.
- Developed REST APIs using Flask and SQLAlchemy, with JWT authentication and user-level access control.
- Implemented server-side transaction search and filters for transaction type, date, and amount.
- Added cursor-based pagination and PostgreSQL indexes to handle growing transaction histories and text searches.
- Implemented optional Redis caching for dashboard data with cache invalidation and PostgreSQL fallback.
- Added request and SQL performance diagnostics, and automated backend tests using Pytest.
- Configured GitHub Actions CI for backend tests and frontend builds, containerized the application using Docker Compose, and deployed it using Vercel, Render, and Supabase.

AI-Powered Pharmaceutical QMS | React, FastAPI, PostgreSQL, LangGraph, Groq LLM

- Built an AI-assisted pharmaceutical complaint management application that processes customer complaints from text and PDF files.
- Built a React interface with Redux Toolkit for shared complaint state, and FastAPI endpoints to process and save complaint records in PostgreSQL.
- Used LangGraph to run LLM-based complaint extraction and initial risk assessment, generating severity, priority, risk summaries, and suggested actions.
- Added an AI Copilot that applies natural-language edits to requested complaint fields while preserving unchanged data.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, PL/SQL, C++
Frontend: React, Redux Toolkit, HTML, CSS, Material UI
Backend & APIs: Flask, FastAPI, SQLAlchemy, Flask-Migrate, REST APIs, JWT Authentication
Databases & Caching: PostgreSQL, SQLite, Oracle SQL, Redis
Testing: Pytest, Postman
DevOps & Version Control: Git, GitHub Actions, Docker, Docker Compose
Cloud & Deployment: Vercel, Render, Supabase
AI Integration: LangGraph, Groq
Enterprise Applications: PeopleSoft, Workday FIN/PSA, Salesforce, Oracle APEX

CERTIFICATIONS/COURSES

Oracle APEX Cloud Developer Certified Professional — Jan 2025
Introduction to Data Analytics — Nov 2025

EXPERIENCE

Hitachi Digital Services Jan 2024 - May 2026
Application Support & Developer *Bangalore, India*

- Built an internal web tool using Oracle APEX and PL/SQL to track and debug application errors.
- Supported PeopleSoft and Workday FIN/PSA modules handling time, expense, and billing workflows.
- Analyzed production issues using SQL queries and tested fixes to maintain reliability.
- Collaborated with cross-functional teams during releases and enhancements.

INTERNSHIP

Hitachi Vantara Feb 2023 - Dec 2023
Intern *Bangalore, India*

- Configured Salesforce features such as flows, validations, approval processes, reports, and dashboards for business needs.
- Developed Apex triggers and unit tests to automate backend business logic.
- Built internal applications using Oracle APEX to support business workflows.

EDUCATION

RNSIT Aug 2019 - May 2023
B.E - Information Science and Engineering - CGPA 8.56

Sri Kumaran Children's Home Composite PU College Aug 2017 - Apr 2019
PUC - PCMCs - 92%

Dayananda Sagar International School Jun 2004 - Mar 2017
ICSE - 92%
